PROFESSIONAL SUMMARY

Technology leader with over a decade of software engineering and technical leadership experience, combined with an MBA in Business Administration. Proven background as CTO and Engineering/Team Lead, directing cross-functional development teams and owning full software delivery lifecycles from requirements through release. Skilled at translating business objectives into technical delivery plans, managing stakeholders across engineering and business functions, and applying Agile practices to keep delivery on track. Now transitioning technical depth and MBA-level business acumen into a Technical Project Manager, Software Delivery Lead, or Technical Product Manager role.

CORE COMPETENCIES

- Technical Project & Program Management
- Software Development Lifecycle (SDLC) Management
- Agile & Scrum Delivery — Sprint Planning, Backlog Management, Retrospectives
- Cross-Functional Team Leadership & Mentoring
- Stakeholder Management & Business–Engineering Alignment
- Product Roadmap & Requirements Gathering
- Risk Identification & Mitigation
- Resource Planning & Allocation
- Technical Strategy & Business Planning (MBA-grounded)
- Release & Deployment Coordination (Git workflows, Docker)
- Vendor & Client Relationship Management
- Tools: Jira, Confluence, GitHub, GitLab, Bitbucket, VS Code

PROFESSIONAL EXPERIENCE

Chief Technology Officer (CTO) & Lead Engineer

Ashalt Worldwide Solution Ltd

Mar 2023 – Present

- Set technology strategy and software delivery direction for the organization, aligning engineering priorities and roadmaps with overall business objectives.
- Direct cross-functional engineering teams through the full software development lifecycle — requirements gathering, planning, development, testing and deployment.
- Own delivery planning and execution across multiple concurrent software projects, coordinating timelines, priorities and resources between engineering, business stakeholders and clients.
- Apply Agile practices (sprint planning, backlog grooming, retrospectives) using Jira to manage delivery cadence and team throughput.
- Act as primary technical point of contact for business stakeholders, translating business requirements into technical specifications and delivery plans.
- Oversee architecture decisions, code quality and engineering standards across PHP/Laravel, Node.js, React and mobile (React Native, Flutter) platforms.
- Manage source-control workflows and release processes across GitHub, GitLab and Bitbucket, coordinating with Docker-based deployment.

Team Lead (Senior Software Engineer), Full-Stack

Wazobia Technologies (UK-based, Remote)

Jul 2022 – Feb 2023

- Led a full-stack engineering team (PHP/Laravel, MySQL, React/TypeScript, Node.js) delivering software solutions for a UK-based client while working remotely across time zones.
- Coordinated task delegation, code review and delivery timelines, keeping the team on track against sprint goals.

- Served as liaison between the development team and stakeholders, communicating progress, blockers and delivery estimates.
- Guided architecture and technology decisions across the PHP/Laravel and React/TypeScript stack.

Chief Developer (Senior Software Engineer) & Engineer

Ashalt Worldwide Solution Ltd

Aug 2017 – Jul 2022

- Directed development using PHP (Laravel), MySQL and JavaScript (jQuery), overseeing project delivery from planning through release.
- Managed technical execution and coordinated delivery across multiple software products built during this period, including a Central Billing System, Case Management System, Motor Vehicle Identification and Licensing System, Insurance Management System, and SaaS platforms for school and inventory management.
- Partnered with business stakeholders to gather requirements and translate them into technical deliverables.
- Mentored junior developers and enforced coding standards and debugging best practices.

Software Developer

K9 Information Systems (Nigeria)

Feb 2016 – Aug 2017

- Developed and maintained software solutions early in career, building foundational full-lifecycle development experience ahead of progressing into technical leadership roles.

KEY PROJECTS DELIVERED

- Central Billing System — end-to-end delivery of a billing platform.
- Case Management System — planning and delivery of a case-tracking platform.
- Motor Vehicle Identification and Licensing System — delivery of a vehicle identification and licensing platform.
- HR System — delivery of a comprehensive Human Resource platform.
- Online School Management System (SaaS) — end-to-end delivery of a multi-tenant SaaS platform for school administration.
- Online Inventory System (SaaS) — end-to-end delivery of a multi-tenant SaaS inventory management platform.
- Integrated Tax Administration System — Building of tax administration workflows that makes tax filing easy for Taxpayers.

EDUCATION

Master of Business Administration (MBA)

Gombe State University — Apr 2019 – Jul 2021

Business and management foundation complementing a technical engineering background — supports the transition into roles that bridge delivery execution and business strategy.

BSc (Hons) Computer Science

Gombe State University — Oct 2010 – Nov 2014

Relevant coursework: Information Systems, Distributed Systems, Algorithms, Software Architecture, Software Engineering, Object-Oriented Programming.

Final Year Project: Design and Implementation of an Integrated Tax Administration System.

TECHNICAL SKILLS

Languages & Frameworks: PHP 8+ (Laravel 10+), Node.js, Express, GraphQL, REST, WordPress, MySQL, React (JS&TypeScript), React Native, Flutter (Dart), HTML5, CSS3, JavaScript (jQuery)

Tools & Platforms: Jira, Git (GitHub, GitLab, Bitbucket), Docker, Visual Studio Code, Microservices Architecture

LANGUAGES

English, Hausa, Fulani, Arabic
